Two Great Rose Novelties

It is a great pleasure the

Coolidge Rare Plant Gardens

takes in offering to our customers two

Superb Roses

MARCIA COOLIDGE

One of our own hybrids. A most beautiful pink, quite distinct from anything known to the trade. It is shaded from deep pink on the under side of the petals to a very delicate pink on the upper side. A half opened bud looks like a most beautiful tulip. It is *particularly distinct* in having bright crimson stamens instead of yellow as all other roses have, and the most exquisite perfume. The fragrance is that of an eastern wild rose, concentrated. The plant is a splendid grower immune to mildew and a constant bloomer.

We can offer for fall delivery strong plants at \$1.00; small ones at 50c.

CLIMBING ORLEANS

This is the rose we have long sought---a most beautiful climbing polyantha of perfect foliage, that blooms for eight months or more in the year. We will admit that nothing is prettier for hedges or fences than the Cherokees, Thousand Beauties and others, but in these you have flowers at most for a few weeks only, but in *Climbing Orleans* you have a rose as beautiful as any of them with a mass of flowers for nearly the entire year.

A great novelty that will be a ***sensation.*** Strong plants for October delivery at \$1.00 each.

Please keep in mind that we are the leaders in fine roses and ornamental plants.
